

# INCLUSIVE<sup>®</sup>

PROSTHETIC COMPONENTS

## ■ Quality

The quality of Inclusive brand prosthetic components has been tested and validated in over 135,000 implant cases. Inclusive prosthetic components are proudly produced in the U.S.A. by Prismatic Dentalcraft, in accordance with the strict quality control standards affirmed by ISO 13485 certification. We ensure tight tolerances, precision machining, state-of-the-art processing and cleaning, and extensive validation testing, to deliver a product you can trust.

## ■ Selection

We offer a wide range of restorative components that are compatible with most implant systems. Whether your restoration is screw-retained, cemented or customized from a UCLA abutment, Inclusive prosthetic components are the right choice for your implant case. Used in dental laboratories and dental clinics in the U.S. since 2009, our restorative components provide predictability and confidence in quality, economy, and function. The uniformity of Inclusive prosthetic components helps to simplify, standardize, and streamline your restorative processes, while our expansive selection of components offers the optimal solution for your case regardless of the restorative connection.

## ■ Business Logic

Inclusive prosthetic components are priced the same for each implant system, helping practices and laboratories operate more efficiently. With consistent pricing, doctors and laboratories know exactly what their component costs will be. Whatever the implant system, fees for implant cases can be established predictably and affordably, ensuring profitability.

## ■ Security

We have assembled a diverse team of experts with decades of combined experience in the design, engineering and manufacture of dental implants. They are complemented by a staff of highly respected researchers, material scientists, clinical specialists, restorative doctors, and dental technicians. Prismatic Dentalcraft is dedicated to advancing implant dentistry by combining proven manufacturing processes with cutting edge materials, technologies, and techniques. We stand by and are committed to our products, offering a seven-year warranty on all Inclusive prosthetic components.
